

OVERVIEW

Wings help your pig fly! The Master Wing 4 is equally at home next to a big Hog console or as part of a Hog 4 PC system. It provides 30 additional faderless playback capabilities for the Hog 4, Full Boar 4, Road Hog 4 and Hog 4 PC software.

The Playback Wing 4 provides ten additional faders plus one Grand Master, all motorized. The Hog 4, Full Boar 4, Road Hog 4 and Hog 4 PC software all benefit from the additional playback hardware the Playback Wing 4 offers.

The wings use the same high quality controls as found in the Hog 4 range of consoles, ensuring responsive and reliable operation. One Hog LED desk light is supplied with each wing, fully dimmable and software controllable. A 15.6-inch touchscreen is integrated in each wing allowing you to expand your console using one integrated unit.
